Special
Education

My degree in Disability and Rehabilitation has given me a unique perspective and approach to teaching. Honestly, teaching was never part of my plans, but it continues to prove as part of God's plan for me! Let me tell you, I am continuously praising Him that it is! I find such joy in having the opportunity to set a "love to learn" foundation for students. I believe in the power of movement while we learn. I believe children are capable of far more than we can imagine and given the opportunity, every child is able to THRIVE, not just survive!
